5. Facilitation and Evidence

- Keep click-by-click procedures in the Learner Guide and lab README files.
- Use the deck to explain mechanisms, artifacts, formulas, thresholds, failure modes and decision evidence.
- Require learners to use mock data only and keep editable evidence.
- Use human approval checkpoints for publication, budget changes, high-risk moderation and crisis actions.
- Finish teaching by 4:00 PM on Day 2; assessment runs 4:00–6:00 PM.

Facilitator Evidence Checklist

Checkpoint	Acceptable evidence
Mechanism understood	Learner can explain the trigger, state, tool call, approval gate and trace.
Artifact is inspectable	Required fields, values, owner, source and decision consequence are visible.
Mock-data boundary	No live customer, campaign credential or personal data is present.
Human oversight	Publication, budget, crisis and sensitive moderation actions show human approval.
Verification completed	The lab Test-it checks pass and the learner keeps the stated output evidence.
